**August 4th, 2023**

Doheny Library, Dean's Office  
University of Southern California

Education:

I am interested in a career in User experience design, and I am looking for a work-study position that will strengthen my ability to conduct qualitative research and apply the insights gathered to create and enhance meaningful user experiences. My interest in UX Design is fueled by my admiration for the design thinking process, which utilizes user engagement, collaboration, and innovative problem-solving to formulate feasible solutions. I am particularly eager to learn through projects involving the collection and analysis of qualitative data from real users. I previously completed a web development internship with Microsoft's New Technologists program, where we employ open-ended responses from actual students to refine my team's project dynamics and flow. I also learned how to prototype using Figma, and how to use CSS and HTML to design the website based on the prototype.

CS:

I am searching for a work-study position that will strengthen my ability to conduct qualitative research and apply the insights gathered to create and enhance meaningful user experiences. My interest in UX Design is fueled by my admiration for the design thinking process, which utilizes user engagement, collaboration, and innovative problem-solving to formulate feasible solutions. I am particularly eager to learn through projects involving the collection and analysis of qualitative data from real users. My experience in the New Technologists program, where we employ open-ended responses from actual students to refine my team's project dynamics and flow, this has equipped me with some relevant research skills.

Sincerely,

Nataisia Hambidge
